Subject: Sylvania Corporation, Hicksville, NY and Bayside, NY

To: Reader

This PDF file contains copies of letters to the Department of Energy (DOE) that request documents that pertain to facilities located in Hicksville, NY, Bayside, NY, or to the Sylvania Corporation. The requests were made under the Freedom of Information Act, 5 U.S.C. 552.

The requests submitted to DOE have been assigned identifying 'FOIA request numbers' and are in chronological order. Each letter from a requester is followed by response letters to that requester from the Department, and all additional correspondence associated with that particular request. There is a page between each case's set of documents in this PDF file that separate the requests.

The documents responsive to each request are not contained in this PDF file. The documents are referenced in the correspondence as "enclosures." All available documents to date that are responsive to any request for documents about the subject matter in question are listed at the beginning of this PDF file. Each document title is preceded by a "DOCS" reference number, which is used by DOE Headquarters FOIA personnel to locate these documents if requested again.

If any additional documents that relate to the subject matter of the requests are located, they will be posted on the DOE FOIA web site under Frequently Requested Documents at
<http://www.ma.mbe.doe.gov/execsec/frequentlyreqdocs.htm>.

Index of Department of Energy (DOE) documents
that relate to the Sylvania Corporation, Hicksville, NY and Bayside, NY;
and are releasable under the Freedom of Information Act, 5 USC 552

July 8, 2004

Each document title is preceded by a "DOCS" reference number, which is used by DOE Headquarters FOIA personnel to locate these documents if requested again. The last four documents listed cannot be located at any DOE office.

The justification for deletions made to any documents that are listed in this index was included in the response letters sent to the requesters. The PDF file entitled "Memorandum to reader" contains that correspondence to the requester and this index of responsive documents. The other documents listed in the index that have not been released previously under the FOIA are releasable in their entirety.

The text of the document listings in the index was copied from the DOCS profile of each document and transferred into the index. Therefore, some document listings begin with an Arabic number, some end with a DOCS number in parentheses, and some end abruptly after 255 characters. Thus, some listings in the index do not include a full description of the document or the number of pages in the document.

Re: Freedom of Information Act Request

Dear Mr. Lopez:

Pursuant to the Freedom of Information Act (FOIA), 5 U.S.C. § 552, and 10 C.F.R. Part 1004, I hereby request copies of any and all licenses, permits, records, correspondence, surveys, reports and documents related to environmental conditions at any facility located in Bayside, New York that was in operation at any point between 1945 and 1970 and was, at any point during that time, licensed to receive, distribute, process, handle, use, or store radioactive materials. In particular, the information should include all documents, regardless of date, related to these facilities, including: (1) copies of any and all Atomic Energy Commission ("AEC") licenses associated with the facility during that time period and related correspondence and documents; (2) inspection reports and annual reports of the site and related correspondence and documents; (3) closure, decommissioning, decontamination or similar reports or assessments and related correspondence, surveys and documents.

Please have the FOIA Coordinator assigned to this request contact me once he or she has identified the documents that fall within the scope of this request, so that we can discuss, prior to copying the materials, how to potentially narrow the scope of this request. I am, of course, willing to pay the reasonable costs associated with this request. I can be reached at (303) 454 2439.

Re: F2001-00283

Dear Ms. van Heuven:

This is in final response to the request for information that you sent to the Department of Energy (DOE) under the Freedom of Information Act (FOIA), 5 U.S.C. 552. You asked for records that relate to the environmental conditions at any facility in Bayside, New York, that was licensed to receive, distribute, process, handle, use, or store radioactive materials from 1945 to 1970.

The request was assigned to several DOE offices to conduct a search of their files for responsive documents. The searches by the Office of Environmental Management and the Office of Health, Environment and Safety at Headquarters and the Chicago Operations Office located the responsive documents identified in the enclosed listing.

Documents identified as Enclosures 1 to 238 are provided in their entirety. Seven documents are enclosed with deletions made under Exemption 6 of the FOIA, 5 U.S.C. 552(b)(6). These documents are identified as Enclosures 238.a. to 244.

Exemption 6 protects from mandatory disclosure "personnel and medical files and similar files the disclosure of which would constitute a clearly unwarranted invasion of personal privacy." The names of individuals who were injured and the names of individuals who provided air, sputum, stool, and urine samples for testing have been deleted from Enclosures 238.a. to 244.

In applying Exemption 6, the DOE considered (1) whether a significant privacy interest would be invaded; (2) whether release of the information would further the public interest by shedding light on the operations or activities of the Government; and (3) whether in balancing the privacy interests against the public interest, disclosure would constitute a clearly unwarranted invasion of privacy.

Printed with soy ink on recycled paper

2662

The withheld information is of a highly personal nature and the individuals to whom it pertains have an expectation that it will remain private. Disclosure of the identities of the individuals would constitute an invasion of their personal privacy because it could reveal private information about their health. Disclosure could subject the individuals to embarrassment, unwanted attention, and communications that would intrude into their personal lives. Disclosure also could result in speculation about their health. Moreover, disclosure of this information will not reveal any aspect about the operations or activities of the Government.

To the extent permitted by law, the DOE, pursuant to Title 10, Code of Federal Regulations (CFR), Section 1004.1, will make available records it is authorized to withhold under the FOIA unless it determines that such disclosure is not in the public interest. In applying Exemption 6, the DOE balanced the public interest in disclosure against the privacy interests of the individuals involved and concluded that the public interest in disclosure did not outweigh the adverse impact of disclosure on the individuals.

This satisfies the standard set forth by the Attorney General on October 12, 2001. That standard states that where release of requested material could adversely impact any particular process of agency or government deliberation; could adversely impact other institutional, commercial, and personal privacy interests that might be implicated by disclosure; or could present an unwarranted risk of adverse impact on the ability of other agencies to protect other important records, the agency is justified in not releasing that material on a discretionary basis.

Searches also were conducted of the files of the History Division in the Office of the Executive Secretariat at Headquarters and the Idaho Operations Office. These searches, however, did not locate any responsive documents. Therefore, pursuant to 10 CFR 1004.4(d), I am unable to provide any responsive documents from these offices.

Pursuant to 10 CFR 1004.7(b)(2), Mr. Marvin E. Gunn, Jr., Manager, Chicago Operations Office, is responsible for the determination to withhold information under Exemption 6. Mr. Warren E. Bergholz, Jr., Acting Manager, Idaho Operations Office, is responsible for the determination for his office that no documents exist that are responsive to your request. I am responsible for the determination of the Office of the Executive Secretariat.

You may challenge the adequacy of the search for responsive documents and the determination to withhold information by submitting a written appeal to the Director, Office of Hearings and Appeals, at HG-1/L 'Enfant Plaza Building, U.S. DOE, 1000 Independence Avenue, SW, Washington, DC 20585-1615. You should submit the appeal within 30 calendar days of receipt of this determination.

The written appeal, including the envelope, must clearly indicate that a FOIA appeal is being made. The appeal must contain all the elements required by 10 CFR 1004.8. Judicial review will thereafter be available (1) in the district where you reside; (2) in the district where you have your principal place of business; (3) in the district where the DOE records are located; or (4) in the District of Columbia.

In your letter you agreed to pay fees associated with the request. Subsequently, in a conversation with Ms. Joan Ogbazghi of this office, you agreed to pay estimated fees of \$200.00. Fees to process the request now have been assessed at \$200.00. You will be billed under separate cover for that amount.

The above referenced number has been assigned to your request and you should refer to it in correspondence with the DOE about this matter. If you have any questions about the processing of the request, you may contact Ms. Ogbazghi on (202) 586-3595.

I appreciate the opportunity to assist you.

Sincerely,

Abel Lopez, Director
FOIA/Privacy Act Group

Re: Freedom of Information Act Request

On behalf of The STAR Foundation and pursuant to the Freedom of Information Act, 5 U.S.C. 552(b), et. seq., I hereby request that you make available copies of all documents in the U.S. Department of Energy's possession which describe or discuss the takings of endangered and threatened sea turtles, as described more fully below. This request covers but is not limited to all draft and final reports, correspondence, memoranda, notes, records of telephone contacts, electronic communications including fax transmissions and Email, or other written records, whether in paper or computer files, preserved via the use of any medium (e.g., paper documents, final notes, or word processors or computer discs, diskettes, hard drives, or network systems.) In addition, this request includes studies, analyses, work papers, internal or external communications of any sort, testimony, press releases, reports, memoranda of the like concerning, recording or in any way related to:

- 1) HASL Technical Memoranda Occupational Survey: Occupational Exposures to Radioactive Dusts: Sylcor Division, Sylvania Electric Products, Inc., Hicksville, N.Y., November 7, 1961; tech memo no: 61-19
- 2) HASL Technical Memoranda Occupational Survey: Occupational Exposures to Radioactive Dusts: Sylcor Division, Sylvania Electric Products, Inc., Hicksville, N.Y., June 22, 1962; tech memo no: 62-18

1) Purpose of request:

The purpose of the request is to gather information on the facility in question and the requested information is currently not available in any other manner.

2) Extent to which STAR will extract and analyze the substantive content of the records:

STAR is qualified to make use of the requested information. The staff has demonstrated the ability to interpret information and communicate that information in a form comprehensible to the general public. Members of the STAR staff have published articles in such national journals as Newsday and Bulletin of Atomic Scientists. STAR is quoted as a reliable source of information on nuclear issues and environmental protection in newspapers across the country, including the New York Times, The Washington Post, and USA Today.

STAR a working relationship with attorneys, physicists, nuclear engineers, medical doctors, biologists and other respected professionals who contribute to the full understanding of these issues.

3) Nature of the specific activity or research in which the records will be used and STAR's qualifications to utilize the information for the intended use in such a way that it will contribute to public understanding:

STAR seeks the requested information solely to contribute to and help shape the public inquiry into the environmental contamination and legacy of the Hicksville operation.

4) Likely impact on the public's understanding of the subject as compared to the level of understanding of the subject prior to disclosure:

The public understanding of the issues related to this facility will be enhanced by the contribution of this information.

5) Size and nature of the public to whose understanding a contribution will be made:

STAR has an active subscribing membership of over 4,000 throughout New York. Several thousand additional members periodically receive mailings from STAR and we provide resource material to electronic and print media outlets with very broad outreach to a safety conscious audience. Additionally, STAR has a web site which receives an average of 700 visitors per day where postings on this issue will be made available.

6) Means of distribution of the requested information:

STAR will share information with other interested parties concerned and post information on its web site.

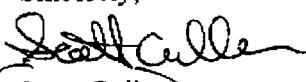

7) Whether free access to information will be provided:

STAR will provide the information without charge to all members of the public. Information prepared from the FOIA requested will be posted on the web site for downloading free of charge.

8) No commercial interest by NIRS or any other party:

STAR has no commercial interest in obtaining the requested information. This information is provided to all public requests without charge. The sole interest of STAR is to promote a policy debate and environmental cleanup.

Sincerely,

Scott Cullen

Re: F2001-00331

Dear Mr. Cullen:

This is in further response to the request for information that you sent to the Department of Energy (DOE) under the Freedom of Information Act (FOIA), 5 U.S.C. 552. You asked for two technical memoranda generated by the Health and Safety Laboratory (HASL) in New York.

Any documents responsive to your request that may exist at the Department are under the jurisdiction of the Chicago Operations Office. For this reason, your request has been transferred to the FOIA Officer at that location to conduct a search for responsive documents and to provide a response to you.

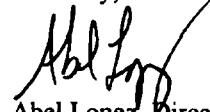

For purposes of assessment of fees, you have been categorized under the Department's regulation implementing the FOIA at Title 10, Code of Federal Regulations, Section 1004.9(b)(4), as an "other" requester. In this category, you are entitled to two hours of free search time and 100 pages at no cost.

In compliance with the FOIA, the 20 day response period will begin when the Chicago Operations Office has received your request. For further information about the processing of the request, you may contact Ms. Linda M. Rohde, FOIA Officer at the Chicago Operations Office, 9800 South Cass Avenue, Argonne, IL 60439. You may also contact her at (630) 252-2041.

The above referenced number has been assigned to your request and you should refer to it in correspondence with this office concerning this matter. This is the final response that you will receive about your request from the DOE Headquarters.

I appreciate the opportunity to assist you.

Sincerely,

Abel Lopez, Director
FOIA/Privacy Act Division
Office of the Executive Secretariat

Dear Mr. Cullen:

In response to your request under the Freedom of Information Act, Headquarters Docket No. F2001-00531, we are enclosing the following documents:

HASL 61-19 (Sylvania-22): "Occupational Exposure to Radioactive Dust" (Sylcor Division, Sylvania Electric Products, Inc., Hicksville, New York) - issued November 7, 1961.

HASL 62-18 (Sylvania-23): "Occupational Exposure to Radioactive Dust" (Sylcor Division, Sylvania Electric Products, Inc., Hicksville, New York) - issued June 22, 1962).

This transmission satisfies and closes out the request.

Sincerely,

Attention: Abel Lopez, Director
FOIA/Privacy Act Division
Office of the Executive Secretariat

Dear Mr. Lopez:

Thank you for your response to our request pursuant to the Freedom of Information Act, 5 U.S.C. 552, dated August 22, 2002, reference number F2002-00259. We have discovered an omission and would appreciate receiving the reports referenced in your disclosure.

More specifically, in your disclosure is correspondence dated June 25, 1979 from William E. Mott, acting director, environmental control technology division, to Richard E. Cunningham, director, U.S. Nuclear Regulatory Commission, referencing an "enclosed May 21, 1979, radiological survey report for the old Sylvania site at Hicksville, Long Island, from the Brookhaven Area Office." That report has not been included in your disclosure.

Dear Mr. Rice:

This is in final response to the request for information that you sent to the Department of Energy (DOE) under the Freedom of Information Act (FOIA), 5 U.S.C. 552. You asked for copies of environmental complaints, violation reports, investigations, and conservation actions for various addresses on Cantinague Rock Road and West John Street in Hicksville, NY.

The DOE Headquarters Office of Environmental Management conducted a search of its files and located the enclosed responsive documents. The documents are provided to you in their entirety. The total fee due for processing the request is \$159.50. You will receive under separate cover an invoice for that amount.

The above referenced number has been assigned to your letter and you should refer to it in your response to this office. If you have any questions about the processing of the request or this correspondence, please contact Ms. Carol Wolf of my staff at (202) 586-3141.

I appreciate the opportunity to assist you with this matter.

Sincerely,

Dear Mr. Deas:

This is in response to your September 4, 2002, letter in which you asked us to provide a report that was missing from our final response to you. The original request that your office sent to the Department of Energy (DOE) under the Freedom of Information Act (FOIA), 5 U.S.C. 552, asked for copies of environmental complaints and other documents that relate to various addresses in Hicksville, NY.

The enclosed responsive documents were located in the original search of the DOE Headquarters Office of Environmental Management, but inadvertently not included with my letter to you dated August 22, 2002. These documents are provided to you in their entirety. Any fees associated with the processing of the enclosed documents have been included in the original fee assessment.

The above referenced number has been assigned to your letter and you should refer to it in your response to this office. If you have any questions about this correspondence, please contact Ms. Carol Wolf of my staff at (202) 586-5955.

I appreciate the opportunity to assist you with this matter.

Sincerely,

RE: FREEDOM OF INFORMATION ACT REQUEST

Via Certified Mail

Dear Sir or Madam:

Pursuant to the Freedom of Information Act (FOIA), 5 U.S.C. 552, I am requesting that any and all documents or information in the possession, custody, or control of the U.S. Department of Energy or its contractors that have been collected, received, created, and/or maintained in support of the Formerly Utilized Sites Remedial Action Program (FUSRAP) which relate to the research and production facility located in Hicksville, New York, owned and operated at various times by Sylvania Corning Nuclear Corporation, Sylvania Electric Products Incorporated, and others. I have worked informally with Don McKensie at 301-903-7426 to identify materials responsive to this request.

I also request copies of any and all FOIA requests submitted to your agency that requested similar documents or information pertaining to this facility.

To the extent that any relevant documents are classified, I request that you declassify and/or sanitize the documents for my review. If there are classified documents that you will not declassify and/or sanitize, I request that you identify any and all such documents by listing date, author, recipient(s), and unclassified subject matter. I would also appreciate receiving any materials you can release as soon as possible, rather than waiting for all of the responsive documents to clear your review process.

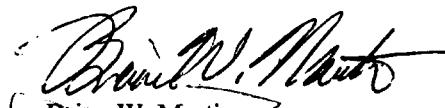

History Associates Incorporated agrees to pay all reasonable and standard processing fees authorized by 5 U.S.C. 552(a)(4)(A) and the applicable regulations up to \$100. If the fees will exceed this amount, please call me with an estimate of the costs so that I can specifically authorize expenditures beyond \$100.

Re: FOIA Request No. F2002-00350

Dear Mr. Martin:

This is in further response to the request for information that you sent to the Department of Energy (DOE) under the Freedom of Information Act (FOIA), 5 U.S.C. 552. You asked for documents maintained in support of the Formerly Utilized Sites Remedial Action Program that relate to the research and production facility in Hicksville, New York. You stated that the facility was owned and operated by Sylvania Corning Nuclear Corporation, Sylvania Electric Products Incorporated, and others.

You also asked for copies of FOIA requests to the DOE for similar documents about the facility.

The request has been sent to the Office of Environmental Management to conduct a search of its files for responsive documents. Upon completion of the search and the review of any documents determined to be responsive, I will provide a final response to you.

In your letter you agreed to pay up to \$100.00 for fees associated with the processing of the request. You also asked to be provided an estimate if fees will exceed that amount.

For purposes of assessment of fees, you have been categorized under the DOE regulation that implements the FOIA at Title 10, Code of Federal Regulations, Section 1004.9(b)(1), as a "commercial use" requester. In this category, you will be charged search, review, and duplication fees associated with the request. This office will provide an estimate to you if processing fees will exceed the amount you have stipulated.

The above referenced number has been assigned to your request and you should refer to it in correspondence with the DOE about this matter. If you have questions about the processing of the request, you may contact Ms. Joan Ogbazghi of my staff on (202) 586-3595.

I appreciate the opportunity to assist you.

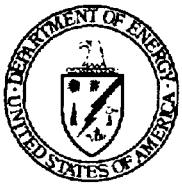

Sincerely,

Re: F2002-00350

Dear Mr. Martin:

This is in final response to the request for information that you sent to the Department of Energy (DOE) under the Freedom of Information Act (FOIA), 5 U.S.C. 552. You asked for documents (1) maintained in support of the Formerly Utilized Sites Remedial Action Program that relate to the research and production facility in Hicksville, New York, and (2) copies of FOIA requests to the DOE for similar documents about the facility. You stated that the facility was owned and operated by Sylvania Corning Nuclear Corporation, Sylvania Electric Products Incorporated, and others.

The Office of Environmental Management at Headquarters conducted a search of its files for documents that are responsive to item 1 and item 2 of the request. We also conducted a search of the FOIA Document Online Coordination System in the Office of the Executive Secretariat for documents that are responsive to item 2. The searches located the documents identified in the enclosed listing. The documents are provided to you in their entirety.

In your letter you agreed to pay up to \$100.00 for fees associated with the processing of the request and asked to be provided an estimate if fees exceed \$100.00. Fees to process the request have been assessed at \$93.68. You will be billed under separate cover for that amount.

The above referenced number has been assigned to your request and you should refer to it in correspondence with the DOE about this matter. If you have questions about the processing of the request, you may contact Ms. Joan Ogbazghi of my staff on (202) 586-3595.

I appreciate the opportunity to assist you.

Sincerely,

Dear Mr. Cohen:

This is in further response to the request for information that you sent to the Department of Energy (DOE) under the Freedom of Information Act (FOIA), 5 U.S.C. 552. You asked for documents created since 1952 that relate to:

- 1) radioactive materials shipped to and from the Savannah River Site;
- 2) radioactive materials shipped to and from Sylcor, AKA Sylvania-Corning;
- 3) the corporations listed as defendants in an Amended Complaint you enclosed with your letter; and
- 4) five addresses on Cantiague Rock Road and West John Street in Hicksville, New York, and the Sylvania-Corning Bayside facility.

We previously received a request from your office that asked for records that relate to item 4 on May 21, 2002. That request was assigned to the control number F2002-00259. I provided to you documents responsive to that request with a letter dated August 22, 2002.

Any documents that may exist that are responsive to item 1 of your request are under the jurisdiction of the Savannah River Operations Office. For this reason, that part that asks for records that relate to radioactive materials shipped to and from the Savannah River Site has been sent to the Savannah River Operations Office for action. They will conduct a search of their files for responsive documents. Upon completion of the search and review of any documents that may be located, the Savannah River Operations Office will provide a response to you.

If you have any questions about the processing that portion of your request, you may contact Ms. Pauline Conner, the FOIA Officer at the Savannah River Operations Office, P.O. Box A., Aiken, South Carolina, to 9002. You also may contact her at 803-725-1408.

A search for documents responsive to items 2 and 3 of the request will be conducted of the files of the Office of Environmental Management, the Office of the Assistant Secretary for Environment, Safety and Health, and the Office of Civilian Radioactive Waste Management at DOE Headquarters. Upon completion of the searches and review of any documents determined to be responsive to the request, I will provide a response to you.

For purposes of assessment of fees, you have been categorized under the DOE regulation that implements the FOIA at Title 10, Code of Federal Regulations, Section 1004.9(b)(4), as an "other" requester. In this category, you are entitled to two hours of free search time and 100 pages of duplication at no cost. We will notify you if fees are expected to exceed the \$100 you have stipulated.

The above referenced number has been assigned to the request and you should refer to it in any correspondence to the Department.

I appreciate the opportunity to assist you with this matter. If you have any questions about the processing of the request or this correspondence, please contact Ms. Carol Wolf of my staff at 202-586-3141.

Sincerely,

Abel Lopez, Director

Dear Mr. Deas:

This is in further response to the requests for information that your firm sent to the Department of Energy (DOE) Headquarters Office and the Brookhaven National Laboratory under the Freedom of Information Act (FOIA), 5 U.S.C. 552. You asked for documents created since 1952 that relate to the Sylvania-Corning Nuclear Corporation and associated business entities and their dealings with the DOE and its predecessors with regard to radioactive materials at sites in South Carolina and New York.

In a conversation with Ms. Carol Wolf of this office on November 7, 2002, you agreed that your requests to DOE Headquarters dated September 25, 2002, and October 30, 2002, would be consolidated with your request to the Brookhaven National Laboratory dated October 31, 2002. This consolidated request has been assigned the number F2002-00523 and you should refer to it in any correspondence to the Department regarding the subject matter of the separate requests.

You were informed in my October 29, 2002, letter that any documents that are responsive to the September 25th request and under the jurisdiction of the Savannah River Operations Office will be processed by that office. The parts of your October 30th request that relate to the Savannah River Site have also been sent to the Savannah River Operations Office to conduct a search of its files for responsive documents. Upon completion of the search and review of any documents that may be located, the Savannah River Operations Office will provide a response to you.

If you have any questions about the processing of those portions of your requests, you may contact Ms. Pauline Conner, the FOIA Officer at the Savannah River Operations Office, P.O. Box A, Aiken, South Carolina 29802. You also may contact her at 803-725-1408.

Documents that may be responsive to the requests are also under the jurisdiction of the Chicago Operations Office. For this reason, the consolidated request has been sent to that office to conduct a search of its files for responsive documents. Upon completion of the search and review of any documents that may be located, the Chicago Operations Office will provide a response to you.

If you have any questions about the processing those portions of your requests, you may contact Ms. Linda Rohde, the FOIA Officer at the Chicago Operations Office, 9800 South Cass Avenue, Argonne, Illinois, 60439. You also may contact her at 630-252-2039.

A search for documents responsive to the rest of the requests will be conducted of the files of the Office of Environmental Management, the Office of the Assistant Secretary for Environment, Safety and Health, and the Office of Civilian Radioactive Waste Management at DOE Headquarters. Upon completion of those searches and the review of any documents determined to be responsive to the request, I will provide a response to you.

For purposes of assessment of fees, you have been categorized under the DOE regulation that implements the FOIA at Title 10, Code of Federal Regulations, Section 1004.9(b)(4), as an "other" requester. In this category, you are entitled to two hours of free search time and 100 pages of duplication at no cost. We will notify you if fees are expected to exceed the \$100 you have agreed to pay.

I appreciate the opportunity to assist you with this matter. If you have any questions about the processing of the request or this correspondence, please contact Ms. Wolf at 202-586-3141.

Dear Mr. Deas:

**SUBJECT: YOUR FREEDOM OF INFORMATION ACT (FOIA) REQUEST NO.
F2002-00523**

By letters to the Brookhaven National Laboratory (BNL) and the Department of Energy (DOE) Headquarters your firm, through the FOIA, requested various documents regarding the Sylvania-Corning Nuclear Corporation and associated business entities. By your October 31, 2002 letter to Mr. Lou Sadler, the senior DOE counsel at BNL, you requested for records for the period 1950 to present pertaining to the Sylvania-Corning Nuclear Corporation and Sylvania Products Corporation Companies (a/k/a Sylvania-Corning, Sylcor, Sylvania Electric Products) whose facilities were/are located at 140, 100, and 70 Cantiague Rock Road in Hicksville, New York. In your letter, you specified the following:

- 1) All reports, records, documentation, minutes, tapes, photographs, blueprints, schematics, correspondence, letters, telexes, memos, maps, graphs, studies pertaining to Sylvania;
- 2) All records, reports, letters, correspondence and memos regarding Brookhaven National Laboratory's refusal to accept equipment and /or materials from Sylvania;
- 3) All records, reports, letters, correspondence and memos regarding Brookhaven's refusal to assist in the decommissioning of Sylvania;
- 4) All records, reports, letters, correspondence and memos regarding Brookhaven's monitoring, analysis and /or testing of air, water, soil and equipment at Sylvania facilities;

Mr. Thomas J. Deas

-2-

DEC 24 2002

- 5) Shipment and receipt records for nuclear and other materials and equipment delivered to and from Sylvania;
- 6) All records and data pertaining to the disposition of radiologically contaminated equipment and radioactive wastes from Sylvania; and,
- 7) Photocopies of any and all contracts and/or agreements between Brookhaven and Sylvania.

In response to your request for documents, both the Brookhaven Area Office and the DOE contractor at BNL, the Brookhaven Science Associates, LLC (BSA), searched for responsive documents. Our search for records resulted in the contractor, BSA, identifying a limited number of records that could be considered responsive to your request. Those records are attached. No other responsive records were found at BNL.

With the release of these documents, I believe your request of October 31, 2002 has been satisfied. I am the Releasing Official responsible for the determination contained herein. You are advised of your right to appeal my determination within 30 days of the receipt of this letter, by written request addressed to the Director, Office of Hearing and Appeals, United States Department of Energy, 1000 Independence Avenue, S.W., Washington, D.C. 20585. Both the request and envelope should be clearly marked "Freedom of Information Appeal." Judicial review will be available thereafter in the district in which your concern is located or has its principal place of business, where records are located, or in the District of Columbia.

Sincerely,

Michael D. Holland

Dear Ms. Walters:

SUBJECT: FREEDOM OF INFORMATION ACT (FOIA) REQUEST NO. F2002-00608

This letter is a partial response to your FOIA request to the Department of Energy (DOE) No. F2002-00608, which seeks copies of documents associated with the Brookhaven Science Associates, LLC (BSA), the DOE management and operating contractor at the Brookhaven National Laboratory. Specifically, your request seeks copies of the following:

- 1) The most current Government Performance Appraisal (and all prior appraisals for the past 3 years) of the contractor's performance managing the lab.
- 2) The contractor's proposal that was used to select the contractor to manage the lab.
- 3) Any safety violations that have occurred within the past five years at the lab (list plus report).

Mr. Lou Sadler, of my office, has been in contact with Mr. Jeff Stachewicz, of your office. They have discussed your request, as well as this response to your request. Copies of the DOE final performance evaluations of BSA for Fiscal Years 1998, 1999, 2000, and 2001 are attached. The Fiscal-Year 2001 performance evaluation is the most recently completed review. A copy of the BSA proposal is not attached. It was not incorporated into the contract and, under law and regulation, is exempt from release under FOIA. As directed by Mr. Stachewicz, we have treated that portion of your request as moot.

Regarding your request for "safety violations," I want to reiterate Mr. Sadler's comments to Mr. Stachewicz that that aspect of your request is unreasonably broad in scope and needs to be further

defined. A "safety violation" at this Laboratory could range in scope from a nuclear safety violation at one end of the spectrum, to a trip hazard or unauthorized electrical plug discovered during a building's safety walk-through at the other end of the spectrum. It would be unreasonable and overly burdensome for me to ask my office and BSA to conduct such an open-ended search for all "safety violations" over the past five years without a further refinement of what you are seeking. Additionally, such an open-ended search and review would be exceedingly expensive and likely exceed your \$65 limit by thousands of dollars. We will await further clarification of this aspect of your request before searching for responsive documents.

Should you have any further questions regarding this matter, please contact Mr. Sadler at (631) 344-3435.

Sincerely,

Dear Mr. Deas:

This is in further response to the requests for information that your firm sent to the Department of Energy (DOE) Headquarters and the Brookhaven National Laboratory under the Freedom of Information Act (FOIA), 5 U.S.C. 552. You asked for documents created since 1952 that relate to the Sylvania-Corning Nuclear Corporation.

During the search, several responsive documents were located in the History Division of the Office of the Executive Secretariat in the Office of Management, Budget and Evaluation. It has been determined that those documents can be released and they are provided in their entirety. In addition, no fees will be assessed to process the request.

Other documents from the Environmental Measurements Laboratory in New York, were released in response to previous FOIA requests. These documents also are enclosed.

I will provide other responsive documents to you as they become available.

The above referenced number has been assigned to the request and you should refer to it in any correspondence with the Department.

I appreciate the opportunity to assist you with this matter. If you have any questions about the processing of the request or this correspondence, please contact Ms. Carol Wolf of my staff at 202-586-3141.

RE: FREEDOM OF INFORMATION ACT REQUEST

Dear Mr. Lopez:

Pursuant to the Freedom of Information Act, 5 U.S.C. 552, I am requesting copies of or access to any and all information and documentation in the possession, custody, or control of the U.S. Department of Energy (DOE) or its contractors pertaining to operations conducted between 1951 and 1972 at the facility located in Hicksville, New York, pursuant to government contract(s) and/or license(s), including but not limited to operations conducted by Sylvania Electric Products and/or Sylvania-Corning Nuclear Corporation.

As part of your response to this request, and to aid you in efficiently conducting your search, we request access to records transmittal forms (describing records stored at DOE operated and controlled facilities as well as Federal Record Centers around the country) and/or other information or documents that will aid us in identifying specific collections.

In the past, DOE and other federal agencies have permitted History Associates Incorporated (HAI) researchers to assist in the review of files referenced in FOIA requests. In cases where potentially relevant records are maintained as part of security classified collections, HAI researchers with appropriate security clearances have been granted "need to know" access by appropriate government officials. This approach has proven cost-effective for all parties concerned. It allows HAI to identify a limited number of responsive documents to be copied, thereby reducing the amount of time required by DOE to review and process documents for release and avoiding a time-consuming item-by-item examination of the requested materials by DOE. Please contact me as soon as possible concerning the feasibility of this arrangement in this instance.

COMMERCIAL SEARCH, REVIEW & REPRODUCTION

F2002-CV660
Carroll

26724

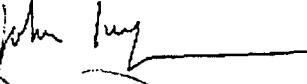

In addition, I also request copies of any and all FOIA requests submitted to your agency that requested similar documents or information pertaining to this facility.

To the extent that any relevant documents are classified, I request that you declassify and/or sanitize the documents for my review. If there are classified documents that you will not declassify and/or sanitize, I request that you identify any and all such documents by listing date, author, recipient(s), and unclassified subject matter. I would also appreciate receiving any materials you can release as soon as possible, rather than waiting for all of the responsive documents to clear your review process.

History Associates Incorporated agrees to pay all reasonable and standard processing fees authorized by 5 U.S.C. 552 (a)(4)(A) and the applicable regulations up to \$250. If the fees will exceed this amount, please call me with an estimate of the costs so that I can specifically authorize expenditures beyond \$250.

If you have any questions please call me at (301) 279-9697 or e-mail me at jtaylor@historyassociates.com.

Dear Mr. Taylor:

This is in further response to the request for information that you sent to the Department of Energy (DOE) under the Freedom of Information Act (FOIA), 5 U.S.C. 552. You asked for documents that pertain to operations conducted by the Sylvania-Coming Nuclear Corporation in Hicksville, New York, between 1951 and 1972.

A search for responsive documents will be conducted of the files of the Office of Environmental Management. Upon completion of the search and review of any documents determined to be responsive to the request, I will provide a response to you.

For purposes of assessment of fees, you have been categorized under the DOE regulation that implements the FOIA at Title 10, Code of Federal Regulations, Section 1004.9 (b) (1), as a commercial requester. In this category, you will be charged search, review, and duplication costs incurred to process the request. We will notify you if fees are expected to exceed the \$250 that you have stipulated.

The above referenced number has been assigned to the request and you should refer to it in any correspondence with the Department.

I appreciate the opportunity to assist you with this matter. If you have any questions about the processing of the request or this correspondence, please contact Ms. Carol Wolf of my staff at 202-586-3141.

Dear Ms. Chalmers:

In another partial response to your request under the Freedom of Information Act (FOIA), Docket No. CH-03-07, for documents pertaining to the Sylvania plant in Hicksville, I am sending you the following documents:

- Sample Data Sheets - Urine - 1952-1953
- Sample Data Sheets - Urine - 1954-1955

These sheets contain individuals' names and other personal identifiers which have been redacted in order to protect the privacy of these individuals. Pursuant to a November 14, 2002 telephone conversation between you and Kimberly Donham, Acting Freedom of Information Officer, Chicago Operations Office, you have agreed not to receive personal identifiers contained in the records.

Additional documents will be transmitted to you at a later date.

Sincerely,

F2003-00195

Dear Ms. Estevez:

This is in further response to the request for information that you sent to the Department of Energy under the Freedom of Information Act (FOIA), 5 U.S.C. 552. You asked for information that pertains to air emissions records and cloud, soot and stack records from the Sylvania Nuclear Facility from 1952 through 1967 that are located at Cantiague Rock Road, Hicksville, New York.

In your letter you requested a waiver of fees associated with the processing of the request. The FOIA provides that "[d]ocuments shall be furnished without any charge or at a charge reduced below the fees established under clause (ii) if disclosure of the information is in the public interest because it is likely to contribute significantly to public understanding of the operations or activities of the government and is not primarily in the commercial interest of the requester." See 5 U.S.C. 552(a)(4)(A)(iii).

The DOE has implemented this statutory standard for fee waivers or reduced fees in its FOIA regulation at Title 10, Code of Federal Regulations (CFR), Section 1004.9(a)(8). Although you have requested a waiver of fees, you have not addressed all the criteria established in that section. The regulation sets forth the following factors that are considered by the agency in applying the criteria:

- (1) The subject of the request: Whether the subject of the requested records concerns "the operations or activities of the government,"
- (2) The informative value of the information to be disclosed: Whether the disclosure is "likely to contribute" to an understanding of government operations or activities;
- (3) the contribution to an understanding by the general public of the subject likely to result from disclosure, taking into account your ability and intent to disseminate the information to the public in a form that can further understanding of the subject matter;
- (4) The significance of the contribution to public understanding: Whether the disclosure is likely to contribute "significantly" to public understanding of government operations or activities;
- (5) The existence and magnitude of a commercial interest: Whether the requester has a commercial interest that would be furthered by the requested disclosure; and
- (6) The primary interest in disclosure: Whether the magnitude of the identified commercial interest of the requester is sufficiently large, in comparison with the public interest in disclosure, that disclosure is "primarily in the commercial interest of the requester."

Printed with soy ink on recycled paper

If you would like your request for a fee waiver to be considered, please provide to Ms. Carolyn Lawson of this office additional information that addresses these factors. You should provide this information by May 8, 2003. A decision about a waiver or reduced fees will be made after receipt of the information. If additional information is not received from you by that date, we will consider your request for a waiver withdrawn.

For purposes of assessment for fees, you have been categorized under the DOE regulation implementing the FOIA at 10 CFR 1004.9(b)(4), as and "other" requester. In this category, you are entitled to two hours of free search time and the first 100 pages at no cost.

The request has been assigned to the Office of the Assistant Secretary for Environment, Safety and Health (EH) to conduct a search of its files for responsive documents. Upon the completion of that search and the review of any documents determined to be responsive, a final response will be provided to you.

We have asked the EH to give us an estimate of the fees to process the request. We will inform you of the estimated amount when it is provided.

The above referenced number has been assigned to the request and you should refer to it in any correspondence to the Department about this matter. If you have any questions about the processing of the request, You may contact Ms. Lawson on (202) 586-8062.

Thank you for your interest in the Department.

F2003-00195

Dear Ms. Estevez:

This is in final response to the request for information that you sent to the Department of Energy under the Freedom of Information Act (FOIA), 5 U.S.C. 552. You asked for information that pertains to air emissions records and cloud, soot and stack records from the Sylvania Nuclear Facility from 1952 through 1967 that are located at Cantiague Rock Road, Hicksville, New York.

At Headquarters, the request was assigned to the Office of Environment, Safety and Health (EH) and the Office of Site Closure in the Office of Environmental Management (EM) to conduct a search of their files for responsive documents.

The offices of EH and EM have completed their searches. However, the searches did not locate any documents that were responsive to the request. Therefore, pursuant to Title 10, Code of Federal Regulations (CFR), Section 1004.4(d), I am unable to provide any responsive documents.

Pursuant to 10 CFR 1004.7(b) (2), Mr. Mark W. Frei, Deputy Assistant Secretary for the Office of Site Closure in the Office of Environmental Management and Mr. Thomas A. Rollow, Director, Office of Worker Advocacy in the Office of Environmental Safety and Health, are the individuals responsible for the determinations that no documents exists for their respective offices.

You may challenge the adequacy of these searches for responsive documents by submitting a written appeal to the Director, Office of Hearings and Appeals, HG-1/L'Enfant Plaza Building, U. S. Department of Energy, 1000 Independence Avenue, SW, Washington, DC 20585-1615. You should submit the appeal within 30 calendar days of receipt of the determination.

The written appeal, including the envelope, must clearly indicate that a FOIA appeal is being made. The appeal must contain all the elements required by 10 CFR 1004.8. Judicial review will thereafter be available (1) in the District of Columbia; (2) in the district where you reside; (3) in the district where you have your principal place of business; (4) in the District where the DOE records are located.

I appreciate the opportunity to assist you with this matter. If you have any questions about this correspondence, please contact Ms. Carolyn Lawson of my staff at (202) 586-8062.

Dear Ms. Estevez:

This is in further response to the request for information that you submitted under the Freedom of Information Act (FOIA), 5 U.S.C. 552. You asked for information that pertained to air emissions records, cloud, soot and stack records from the Sylvania Nuclear Facility located at Cantiague Rock Road, Hicksville, New York, from 1952 through 1967.

The request was assigned to the Office of Environment, Safety and Health (EH) and the Office of Site Closure in the Office of Environmental Management (EM) to conduct a search of their files for responsive documents. On September 12, 2003, I provided you a final response that indicated that no documents were located by either office.

In a letter to the Office of Hearings and Appeals (OHA) dated October 3, 2003, you challenged the adequacy of search for responsive documents by these offices. The OHA reviewed your submission and agreed in part with your appeal. In a Decision and Order dated November 25, 2003, OHA remanded the request to EM to conduct a new search for documents responsive to the request.

The EM has completed the search of its files. The enclosed documents were determined to be responsive to your request. The documents are provided to you in their entirety and at no cost.

I appreciate the opportunity to assist you with this matter. If you have any questions about this correspondence, please contact Ms. Carolyn Lawson of my staff at (202) 586-8062.

Dear Mr. Blaber :

This is in further response to the request for information that you sent to the Department of Energy (DOE) under the Freedom of Information Act (FOIA), 5 U.S.C. 552. You asked for reports and correspondence that relate to the explosion at the Sylvania Electric facility in Bayside, New York, in July of 1956.

A search for responsive documents was conducted of the files of the Office of the Executive Secretariat, where documents that relate to Sylvania facilities in New York are maintained.

One document responsive to the request was located. That document, a report to the Governor of New York in 1957, is provided to you with some portions deleted. The material withheld is being reviewed under the FOIA to determine its releasability. Upon completion of the review you will be provided a response that releases the information or identifies any FOIA exemption that is invoked, the reason for applying the exemption, and an explanation of how the information withheld falls within the scope of any exemption that is cited.

The above referenced number has been assigned to the request and you should refer to it in any communications with the DOE. If you have any questions about the processing of this request or this correspondence, please contact Ms. Carol Wolf of my staff at (202) 586-5955.

I appreciate the opportunity to assist you with this matter.

F2003-00715

Dear Mr. Ravnitzky:

This is the final response to the request for information that you sent to the Department of Energy (DOE) under the Freedom of Information Act (FOIA), 5 U.S.C. 552. You asked for documents that relate to 33 separate FOIA requests received by this office.

In a telephone conversation with Ms. Carol Wolf of my staff on November 5, 2003, you modified the scope of the request. The modified request asked only for the incoming request letter, and our interim and final letters to the requesters of the listed requests.

A search for documents responsive to the request number F2003-00715 was conducted of the files of the Office of the Executive Secretariat. The search located the documents identified on the enclosed listing that are responsive to the request.

The documents numbered 13A, 13B, 14A, 14B, 14C, 14D, 14E, 14F, 14G, 15A, 15B, 15C, 15D, 19A, 26A, 26B, 26C, 30A, 30B, 30A, 30C, 33A, 33B and 33C in the enclosed index are provided to you with certain information withheld. The remainder of the enclosed documents are provided to you in their entirety. The documents are provided at no cost to you.

The information withheld from the documents is exempt from disclosure pursuant to Exemption 6 of the FOIA, 5 U.S.C. 552(b)(6). This exemption protects "personnel and medical files and similar files the disclosure of which would constitute a clearly unwarranted invasion of personal privacy." In applying Exemption 6, the DOE considered (1) whether a significant privacy interest would be invaded; (2) whether release of the information would further the public interest by shedding light on the operations or activities of Government; and (3) whether in balancing the privacy interest against the public interest, disclosure would constitute a clearly unwarranted invasion of privacy.

The personal street addresses, electronic mail addresses, or telephone and fax numbers have been deleted from the documents with deletions. The Social Security number, date and place of birth, and citizenship status of an individual also have been deleted from the

Printed with soy ink on recycled paper

20

38490

document numbered 15A. The name of an alleged rapist, the name of the alleged rape victim, and other information that would identify them have been deleted from the document numbered 30A.

Disclosure of the information withheld under Exemption 6 would constitute an invasion of the personal privacy of the individuals because it could lead to unwanted communications, attention, embarrassment and harassment. Release of the telephone numbers and the addresses could facilitate such unwanted communications. Moreover, disclosure of an individual's Social Security number, date and place of birth, and citizenship status would make that individual vulnerable to identity theft. Finally, the identification of an individual as an alleged rapist or alleged rape victim would cast that individual in an unfavorable light and could lead to unwanted communications, attention, embarrassment and harassment.

The information deleted does not relate to the operations of the agency or of the federal government, the core purpose for which the FOIA was enacted. Moreover, there is no public interest relative to the core purpose of the FOIA that would be served by the disclosure of the personal information which has been withheld. Thus, since there is a viable privacy interest that would be threatened by such disclosures, Exemption 6 authorizes the withholding of this material.

To the extent permitted by law, the DOE, pursuant to Title 10, Code of Federal Regulations (CFR), Section 1004.1, will make available records that it is authorized to withhold under the FOIA, when it determines that such disclosure is in the public interest. We have determined that the disclosure of material withheld under Exemption 6 would not be in accordance with 10 CFR 1004.1.

In applying 10 CFR 1004.1 to material subject to Exemption 6, we balanced the public interest in disclosure against the privacy interests of the individuals involved. We concluded that the public interest in disclosure did not outweigh the adverse impact of disclosure on the individuals.

Pursuant to 10 CFR 1004.7(b)(2), I am responsible for the denial of the information withheld under Exemption 6. Releasable information in the documents that we have identified has been segregated and is being provided to you.

You may challenge the determination to withhold information by submitting a written appeal to the Director, Office of Hearings and Appeals, at HG-1/L'Enfant Plaza Building, U.S. DOE, 1000 Independence Avenue, SW, Washington, DC 20585-1615. You should submit the appeal within 30 calendar days of receipt of this determination.

The written appeal, including the envelope, must clearly indicate that a FOIA appeal is being made. The appeal must contain all the elements required by 10 CFR 1004.8. Judicial review will thereafter be available (1) in the district where you reside; (2) in the district where you have your principal place of business; (3) in the district where the DOE records are located; or (4) in the District of Columbia.

The above referenced number has been assigned to the request and you should refer to it in any communications with the DOE. If you have any questions about the processing of the request or this correspondence, please contact Ms. Wolf of my staff at (202) 586-5955.

I appreciate the opportunity to assist you with this matter.

Sincerely,

Abel Lopez, Director
FOIA/Privacy Act Group
Office of the Executive Secretariat

RE: FREEDOM OF INFORMATION ACT REQUEST

Dear Sir or Madam:

Pursuant to the Freedom of Information Act, 5 U.S.C. 552, I am requesting the following three things:

1. Any and all documents and information regarding the authority, procedures, and criteria the U.S. Department of Energy (DOE) or its contractors used to designate sites as either eligible or ineligible for remediation under the auspices of the Formerly Utilized Sites Remedial Action Program (FUSRAP). History Associates Incorporated (HAI) understands that at least some of this information is available in programmatic protocols and guidelines/criteria derived primarily from federal regulations and legislation and maintained by the DOE's Office of Site Closure (EM-30).
2. Any and all information pertaining to DOE's determination that Sylvania's Hicksville plant (given identification number NY.19 on the FUSRAP Considered Sites Database Report) had been "eliminated from consideration under FUSRAP."
3. Any and all documents or information in the possession, custody, or control of the DOE or its contractors that have been collected, received, created, and/or maintained in support of FUSRAP which relate to the research facility located in Bayside, New York, owned and operated at various times by Sylvania Corning Nuclear Corporation, Sylvania Electric Products Incorporated, and others.

To aid you with your search for materials pertaining to this last item, HAI has identified the following documents of interest:

F2004-00101

Carrie

<u>Date:</u>	<u>Document Type and Title:</u>
November 10, 1948	Memorandum from Smiley to Files: "Uranium Powder Metallurgy Conference at Sylvania Electric Products, Bayside, L.I."
January 20, 1949	Memorandum from Morgan to Koenig, "Invoice for YN-5 Wafers"
February 4, 1949	Memorandum from Smiley to Files, "Conference at Sylvania on Program for Power Pile Division"
February 18, 1949	Letter from Naymark to Heusner regarding shipment of 2 samples of zirconium
June 7, 1949	Memorandum from Toelken to Smiley regarding shipment of 100 pounds of uranium wafer
October 31, 1949	Memorandum from Sharpe to Roboff, "Enriched uranium requirements for Core Alloys at Sylvania"
November 2, 1949	Memorandum from Kramer to Distribution regarding a shipment of uranium zirconium alloy powder compacts
May 1, 1950	Memorandum from Anscher to Hunter regarding shipment of 95 pounds of uranium wafer discs to Bayside
June 16, 1950	<u>Hot Pressing of Uranium</u> , by Hausner and Pinto
April 3, 1952	Memorandum from Belmore to Koenig, "Uranium Wafer Requirements"

March 5, 1954	Letter from Huke to Eichelberger, "Contract []-17-028 ENG-35"
1954	Documents from Subcontract File, Proposed P.O. #05165 - GE - APES - Sylvania Electric
January, 1956	Monthly Progress Report, "Reduction of Uranium Oxide by Carbon December 1, 1955 to January 1, 1956"

January 30, 1956	Proposal for [illegible] of Ceramic Pellet Program
January 31, 1956	Letter from Whitman to LeGassie regarding carbon reduction of uranium. Annotated.
May 1, 1956	Letter from Whitman to LeGassie regarding carbon reduction of uranium oxide
June 1, 1956	Letter from Whitman to LeGassie regarding carbon reduction of uranium oxide
August 20, 1956	Accident Report "Thorium Explosion" at Bayside
December, 1956	Article concerning the Bayside thorium accident copied from Nucleonics

We suggest that this be used as a starting point in your search for specific documentation related to Sylvania's Bayside facility, but that your review *not be limited* to a search for just these materials.

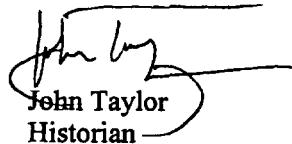

I also request copies of any and all FOIA requests submitted to your agency that requested similar documents or information pertaining to this facility.

To the extent that any relevant documents are classified, I request that you declassify and/or sanitize the documents for my review. If there are classified documents that you will not declassify and/or sanitize, I request that you identify any and all such documents by listing date, author, recipient(s) and unclassified subject matter. I would also appreciate receiving any materials you can release as soon as possible, rather than waiting for all of the responsive documents to clear your review process.

History Associates agrees to pay all reasonable and standard processing fees authorized by 5 U.S.C. 552(a)(4)(A) and the applicable regulations up to \$100. If the fees will exceed this amount, please call me with an estimate of the costs so that I can specifically authorize expenditures beyond \$100.

If you have any questions, please call me on (301) 279-9697 or email me at jtaylor@historyassociates.com.

Sincerely,

John Taylor

Re: F2004-00101

Dear Mr. Taylor:

This is in further response to the request for information that you sent to the Department of Energy (DOE) under the Freedom of Information Act (FOIA), 5 U.S.C. 552. You asked for documents that relate to the Formerly Utilized Cites Remedial Action Program (FUSRAP) and the Hicksville plant site of Sylvania.

A search for responsive documents will be conducted of the files of the Office of Environmental Management. Upon completion of the search and review of any documents determined to be responsive to the request, I will provide a response to you.

You agreed to pay up to \$100 for fees associated with the processing of the request. You asked, however, to be notified if fees exceed that amount. We will notify you if fees are expected to exceed the \$100 that you have stipulated.

For purposes of assessment of fees, you have been categorized under the DOE regulation that implements the FOIA at Title 10, Code of Federal Regulations, Section 1004.9 (b) (1), as a commercial requester. In this category, you will be charged search, review, and duplication costs incurred to process the request.

The above referenced number has been assigned to the request and you should refer to it in any communication with the Department about this matter. If you have any questions about the processing of the request or this correspondence, please contact Ms. Carol Wolf of my staff at 202-586-5955.

I appreciate the opportunity to assist you.

Sincerely,

A handwritten signature in black ink, appearing to read "Abel Lopez".

Re: F2004-00101

Dear Mr. Taylor:

This is in further response to the request for information that you sent to the Department of Energy (DOE) under the Freedom of Information Act (FOIA), 5 U.S.C. 552. You asked for documents that relate to the Formerly Utilized Cites Remedial Action Program at the Bayside site and the Hicksville plant site of Sylvania. Both of these sites are located in the State of New York. You particularly requested copies of FOIA requests submitted to DOE that pertained to the Bayside site.

In a telephone conversation with Ms. Carol Wolf of my staff, you stated that copies of FOIA request letters to DOE and the final response letters to the requester from this office would satisfy this portion of your request.

A search for copies of FOIA requests that pertained to the Bayside site was conducted of the FOIA case management system in the Office of the Executive Secretariat. The search located the documents identified on the enclosed listing that are responsive to the request. I also have included several documents that were located by using the search term "Bayside" and that were sent as enclosures to other requesters.

Documents that were previously released to other requesters are provided to you as they were released to them. Some of the documents are provided to you in their entirety. Portions of the documents numbered 17, 18, 19 and 20, however, are being reviewed under the FOIA to determine their releasability. Upon completion of this review, I will provide you a response on the results of that the review.

Documents responsive to the other portions of the request have been located and are being reviewed for releasability. I will provide a determination to you on their releasability upon completion of that review.

The above referenced number has been assigned to the request and you should refer to it in any communication with the Department about this matter. If you have any questions

about the processing of the request or this correspondence, please contact Ms. Wolf of my staff at 202-586-5955.

I appreciate the opportunity to assist you.

Sincerely,

Abel Lopez, Director

Re: F2004-00101

Dear Mr. Taylor:

This is in further response to the request for information that you sent to the Department of Energy (DOE) under the Freedom of Information Act (FOIA), 5 U.S.C. 552. You asked for documents that relate to the Formerly Utilized Cites Remedial Action Program at the Bayside site and the Hicksville plant site of Sylvania.

My letter to you dated March 11, 2004, included copies of documents from the files of this office that pertained to the Bayside site. On March 23, 2004, you left a message for Ms. Carol Wolf of this office that requested the documents provided to a requester in response to F2003-00195.

Sixteen of the 17 enclosures that were included with the response to F2003-00195 are provided to you with this letter on a CD-rom. The enclosure numbered 17 will be provided in a subsequent response with other documents responsive to your request.

No fees were incurred to process this portion of the request.

The above referenced number has been assigned to the request and you should refer to it in any communication with the Department about this matter. If you have any questions about the processing of the request or this correspondence, please contact Ms. Wolf of my staff at 202-586-5955.

I appreciate the opportunity to assist you with this matter.

Sincerely,

Abel Lopez, Director

Re: F2004-00101

Dear Mr. Taylor:

This is in further response to the request for information that you sent to the Department of Energy (DOE) under the Freedom of Information Act (FOIA), 5 U.S.C. 552. You asked for documents that relate to the Formerly Utilized Cites Remedial Action Program at the Bayside site and the Hicksville plant site of Sylvania. Both of these sites are located in the State of New York.

The search of the files of the Office of Environmental Management located the documents identified on the enclosed listing. The documents are provided to you in their entirety.

The fees incurred to process the request are \$353.20. You will be billed for this amount under separate correspondence.

Several other documents responsive to the request have been located and are being reviewed for releasability. I will provide a determination to you on their releasability upon completion of that review.

The above referenced number has been assigned to the request and you should refer to it in any communication with the Department about this matter. If you have any questions about the processing of the request or this correspondence, please contact Ms. Carol Wolf of my staff at 202-586-5955.

I appreciate the opportunity to assist you.

Sincerely,

RE: FREEDOM OF INFORMATION ACT (FOIA) REQUEST - F2004-00101

Dear Mr. Lopez:

Pursuant to the Freedom of Information Act, 5 U.S.C. 552, I am submitting this as an addendum to History Associates Incorporated's (HAI) FOIA request given the reference number F2004-00101 by the Department of Energy (DOE). In this request, HAI asked for documents that related to the Formerly Utilized Sites Remedial Action Program (FUSRAP) at Sylvania's Bayside and Hicksville sites in New York.

As discussed in our communication with Carol Wolf on April 19, 2004, upon careful review of the documents on the CD-ROM that HAI received from DOE on April 8, 2004, we noticed that some of the responsive documents indicated that there were "enclosures" or "attachments," which appear to be missing. In addition, there were a couple of references to documents or collections that I would like to request. Specifically, I am interested in obtaining copies of the following:

- the "fourteen enclosures" referred to in paragraph two of the May 2, 1973, Giboney to Deal letter, which included AEC Manual Chapters 5170 and 5182 (see "Enclosure A");
- the February 9, 1973, Deal memo which was referenced in the first paragraph of the previously mentioned Giboney to Deal letter;
- the "attached list" mentioned at the bottom of page two of the aforementioned Giboney to Deal letter;

39941

- any and all records in the "rather voluminous general correspondence file on the Sylcor contract negotiations," which was referenced in the final paragraph of the aforementioned Giboney to Deal letter; and
- the "Sylcor Bldg Charts (2)" and "Requisition" attachments listed at the bottom of the April 1, 1966, Memorandum from Johnson to Stetson originally titled "Final Inspection of Sylcor's Hicksville Plant" (see "Enclosure B").

To the extent that any relevant documents are classified, I request that you declassify and/or sanitize the documents for my review. If there are classified documents that you will not declassify and/or sanitize, I request that you identify any and all such documents by listing date, author, recipient(s), and unclassified subject matter. I would also appreciate receiving any materials you can release as soon as possible, rather than waiting for all of the responsive documents to clear your review process.

HAI agrees to pay all reasonable and standard processing fees authorized by 5 U.S.C. 552 (a)(4)(A) and the applicable regulations up to \$250. If the fees will exceed this amount, please call me with an estimate of the costs so that I can specifically authorize expenditures beyond \$250.

If you have any questions, please call me at (301) 279-9697 or e-mail me at nkatinborland@historyassociates.com.

Sincerely,

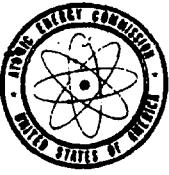

Nat Katin-Borland
Research Historian

RADIOLOGICAL CLEANUP AND SITE DISPOSAL ACTIONS

Recent conversation between K. E. Herde of this office and R. E. Allen of your staff revealed a change in plans since your February 9, 1973, memo on this subject. Mr. Allen requested that pertinent correspondence and reports on the final cleanup of the Sylcor plant at Hicksville, New York, be transmitted since he does not now plan to visit this site.

In addition to specific response to the four items included in your memorandum, we are sending fourteen enclosures that describe the radiological aspects of the Sylcor operations. Response to the four items follows:

1. The criteria applied were at that time being developed cooperatively by your Division and the Regulatory group for subsequent inclusion in AEC Manual Chapters 5170 and 5182. (See enclosures numbered 1

~~FINAL INSPECTION OF SYLCOR'S HICKSVILLE PLANT~~

STR:KEN:fh

As discussed with A. J. Rizzo and Harold Glauberman of your staff by Karl Herde of this office, we request that Mr. Glauberman, who was at Sylcor with Herde on January 4, be made available again on April 6 or 7 for another brief inspection of subject facility. The exact time and date will be arranged by telephone.

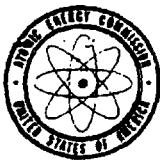

The attached charts of the Sylcor Buildings indicate the areas being re-cleaned and indicate relative contamination levels. Also attached is a copy of the requisition arranging additional cleanup by Isotopes, Inc.

We recommend that Glauberman work with Grieb making a few spot alpha instrument readings at each building. We have little doubt that the building will be found to have less than 2000 d/m smearable activity at any location. An informal confirmation of the survey and general statement on apparent improvements since January 4 will be appreciated.

1. The criteria applied were at that time being developed cooperatively by your Division and the Regulatory group for subsequent inclusion in AEC Manual Chapters 5170 and 5182. (See enclosures numbered 1 and 2.)
2. The final radiological situation of the site and buildings is described in an enclosed copy of "Decontamination of Sylcor 1293 Area" by F. J. Bradley, Health Physicist of Isotopes, Inc. (Encl. 3) who was retained by Sylcor to decontaminate the facility. Correspondence confirming the transfer of uranium scrap to the Fernald, Ohio, plant for recovery, and wastes, sludges and contaminated equipment to the Savannah River Plant site is also enclosed.
3. Correspondence and records not previously mentioned are included in part in other enclosures.
4. The history of operational activity and Atomic Energy Commission involvement at the Hicksville site predicated SROO participation which began by an agreement of July 30, 1954. Previous to that date the contract AT(30-1)-1293 was a research and development

contract between the New York Operations Office and Sylvania Electric Products, Inc. The original proposal of the SROO contract involved a fixed fee agreement for the production of 25,000 enriched uranium slugs to be canned by a pressure bonding technique developed by Sylvania at the Hicksville plant. The necessary aluminum cans, caps and alloy slugs were furnished to Sylvania by the Commission. This original agreement was to be completed by December 31, 1954. That agreement was followed by a cost-plus-fixed-fee contract agreement that continued under the number designation AT(30-1)-1293 for eleven additional years at an average annual cost of nearly three million dollars. The machining and cladding of fuel elements for SRP reactors continued to be the entire service rendered by Sylcor under this contract. The seven principal buildings (see sketch in Encl. 3) had a total square footage of about 50,000. After January 1965 a part of the facility was used for non-AEC commercial interest contracts.

Since New York Operations Office was conveniently nearby and had previously been obliged to make radiological surveys at that site, their health physics services were used to supplement frequent visits by this office. The staff of the Hicksville operation of Sylcor usually varied from 70 to 130 persons. Final cleanup under the direction of Isotopes, Inc. involved the drumming of sump sludges for shipment by this office to the SRP contaminated waste burial grounds.

If additional details are required, we would be pleased to have one of your staff assist in the search through a rather voluminous general correspondence file on the Sylcor contract negotiations.

Re: F2004-00101

Dear Mr. Taylor:

This is in final response to the request for information that you sent to the Department of Energy (DOE) under the Freedom of Information Act (FOIA), 5 U.S.C. 552. You asked for documents that relate to the Formerly Utilized Cites Remedial Action Program at the Bayside site and the Hicksville plant site of Sylvania. You also asked for copies of FOIA requests to the department seeking similar documents or information.

The first enclosed document is the last of the documents located during the search of the files of the Office of Environmental Management (EM). It is listed as Document 1 in the index, and it is provided to you in its entirety. This document is provided to you as it was transmitted by EM to this office. We always provide the most complete version of any requested document that is available.

One of the responsive documents that I provided with my letter to you dated April 5, 2004, was a letter from this office in response to a FOIA request, F2003-00195. The index of documents provided with the April 5 letter listed a document numbered "17." I have determined, however, that no such document exists. The title was created from the document numbered "4" on the index together with the date from an unrelated document. I apologize for any confusion this may have caused.

The documents numbered 17, 18, 19, and 20 in the enclosed index are referenced in my letter dated March 11, 2004. These documents were found in a search of the files of the Office of the Executive Secretariat.

We have completed our review of the documents, and they are provided to you with certain information withheld under Exemption 6 of the FOIA, 5 U.S.C. 552(b)(6). Exemption 6 protects "personnel and medical files and similar files the disclosure of which would constitute a clearly unwarranted invasion of personal privacy."

In applying Exemption 6, the DOE considered (1) whether a significant privacy interest would be invaded; (2) whether release of the information would further the public interest by shedding light on the operations or activities of Government; and (3) whether in balancing the privacy interest against the public interest, disclosure would constitute a clearly unwarranted invasion of privacy.

The information deleted from the documents under Exemption 6 is personal street addresses, e-mail addresses, or telephone numbers. Disclosure of the telephone numbers and the addresses

Printed with soy ink on recycled paper

41663

could facilitate unwanted communications, attention and harassment, and constitute an invasion of the personal privacy of the individuals.

The information withheld does not relate to the operations of the agency or of the federal government, the core purpose for which the FOIA was enacted. Moreover, there is no public interest relative to the core purpose of the FOIA that would be served by the disclosure of the personal information that has been withheld.

Pursuant to Title 10, Code of Federal Regulations (CFR), Section 1004.1, the DOE will make records available that it would be authorized to withhold under the FOIA whenever it determines that such disclosure is in the public interest. I have determined that disclosure of the information withheld would adversely impact the privacy of the individuals concerned and would not be in the public interest.

Pursuant to 10 CFR 1004.7(b)(2), I am responsible for the denial of the information withheld under Exemption 6.

The fees incurred to process the request are \$1139.00. You will be billed for this amount under separate correspondence.

You may challenge the adequacy of the search for documents and the determinations to withhold information by submitting a written appeal to the Director, Office of Hearings and Appeals, at HG-1/L'Enfant Plaza Building, U.S. DOE, 1000 Independence Avenue, SW, Washington, DC 20585-1615. You should submit the appeal within 30 calendar days of receipt of this letter.

The written appeal, including the envelope, must clearly indicate that a FOIA appeal is being made. The appeal must contain all the elements required by 10 CFR 1004.8. Judicial review will thereafter be available (1) in the district where you reside; (2) in the district where you have your principal place of business; (3) in the district where the DOE records are located; or (4) in the District of Columbia.

The above referenced number has been assigned to the request and you should refer to it in any communication with the Department about this matter. If you have any questions about the processing of the request or this correspondence, please contact Ms. Carol Wolf of my staff at 202-586-5955.

I appreciate the opportunity to assist you with this matter.

Sincerely,

Abel Lopez, Director
