DRY STORAGE

A dry cask loaded with spent fuel being lifted from a horizontal transporter to be placed vertically on a storage pad. Photo courtesy of Sandia National Laboratories.

Department of Energy Managed Waste

SPENT NUCLEAR FUEL

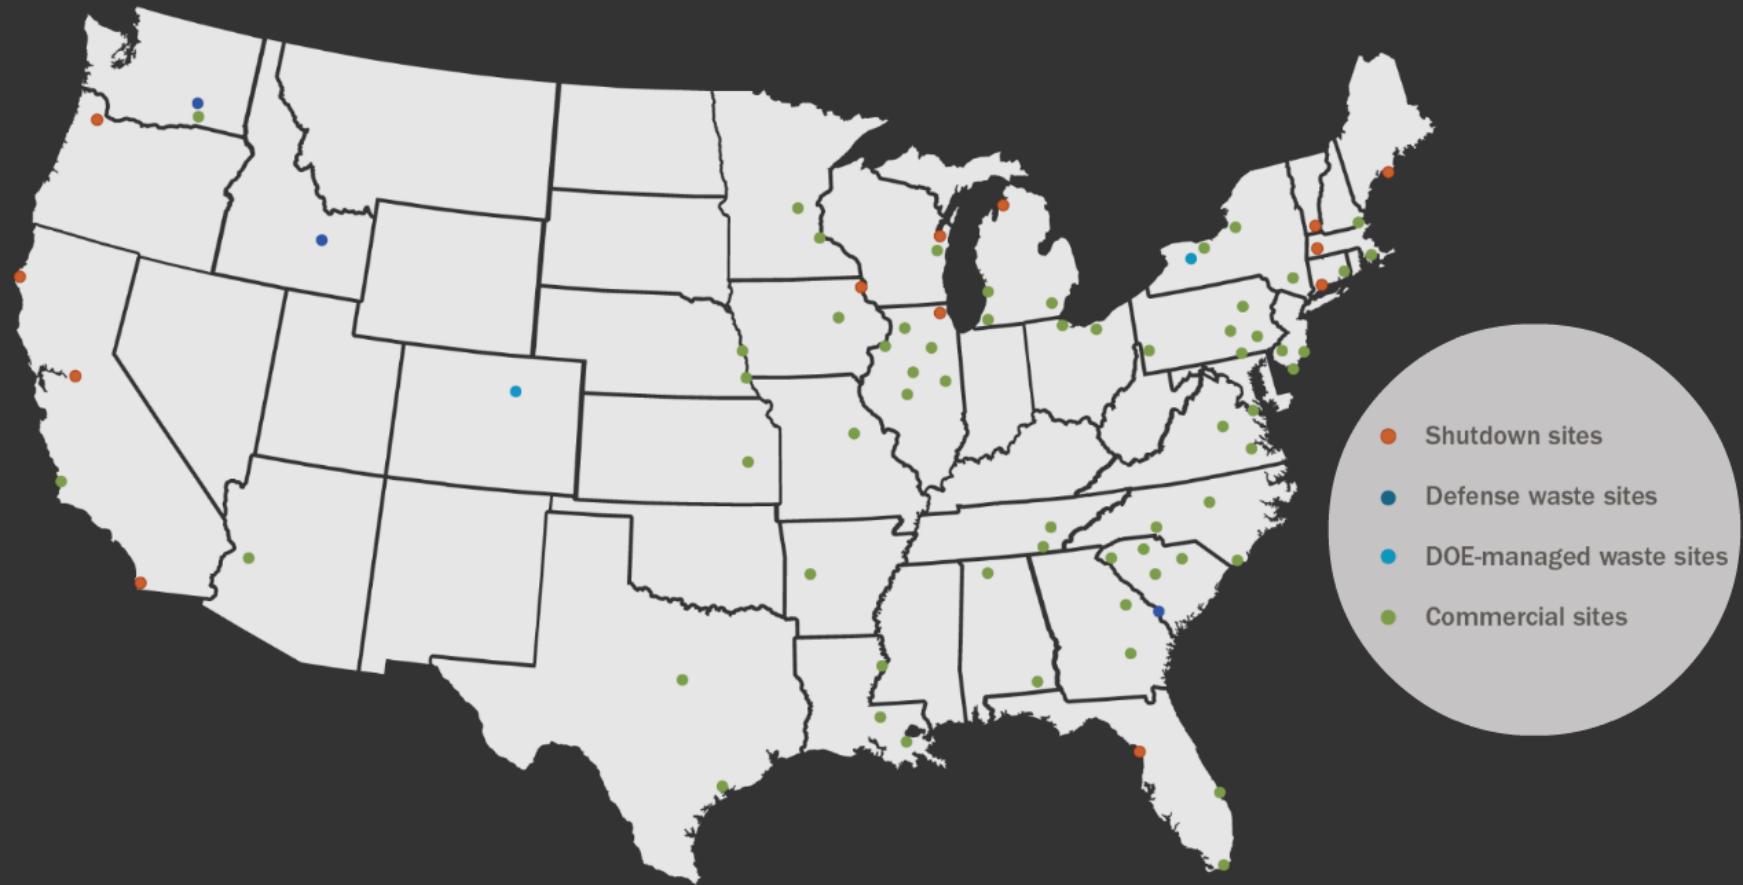

~75,000

metric tons of
uranium

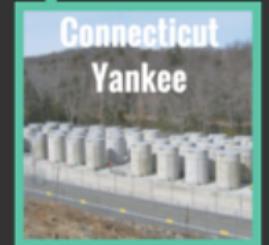

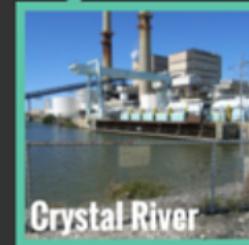

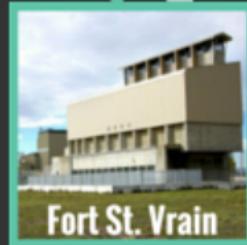

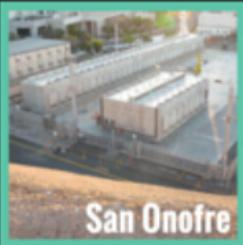

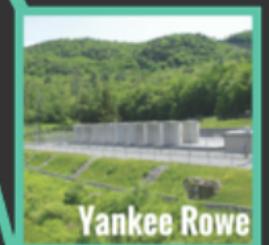

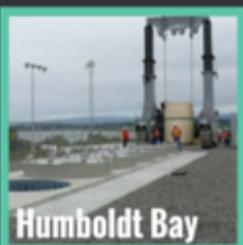

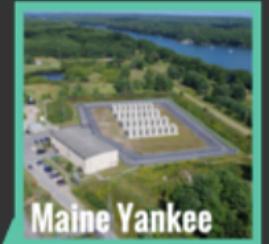

HIGH-LEVEL RADIOACTIVE WASTE

~12,000,000

cubic feet of
high-level waste

Shutdown Power Reactor Sites

WHY ACT NOW?

- The waste was created producing electricity and nuclear deterrent for our benefit
- Taxpayer liabilities are large and growing
- Government has a legal obligation to act
- Need to provide for safe, sustainable storage and disposal now to avoid leaving the problem to future generations
- We have the technology and resources to deal with the waste today

History and Our Approach

TIMELINE DEVELOPMENT OF NUCLEAR POWER

- 1934 Enrico Fermi splits the atom and achieves the world's first nuclear fission
- 1942 Manhattan Project forms to build the atomic bomb for use in World War II
- 1945 U.S. produces first nuclear weapons
- 1953 U.S. launches the first nuclear-powered submarine, the U.S.S. *Narwhal*
- 1954 Congress passes the Atomic Energy Act of 1954, providing direction for the peaceful use of atomic energy
- 1955 U.S. begins using nuclear power to generate electricity

DEVELOPMENT OF GEOLOGIC DISPOSAL

- 1957 National Academy of Sciences recommends geologic disposal for disposing of nuclear waste
- 1970 U.S. begins a search for potential repository sites
- 1970 Lyons, Kansas site selected as the first national repository
- 1972 Government withdraws from operations at Lyons site due to technical uncertainties and public opposition

NUCLEAR WASTE POLICY ACT AND YUCCA MOUNTAIN

- 1982 Congress passes NWPA, establishing process for selecting a disposal site
- 1986 DOE recommends three sites for further study, including Yucca Mountain
- 1987 Congress amends NWPA, directing DOE to study only Yucca Mountain
- 1988-2002 DOE studies Yucca Mountain extensively
- 1998 DOE misses deadline to begin accepting spent nuclear fuel
- FEB 2002 DOE recommends Yucca Mountain as the nation's first disposal site and President Bush submits recommendation to Congress
- APR 2002 Nevada Governor Quinn submits official notice of disapproval to Congress
- JUL 2002 President Bush signs joint resolution approving Yucca Mountain as repository site
- 2008 DOE submits license application for construction of repository to NRC
- 2009 Administration determines Yucca Mountain is not a workable solution. DOE suspends activities at the site

THE BLUE RIBBON COMMISSION AND CONSENT-BASED SITING

- 2010 Secretary of Energy Chu establishes the Blue Ribbon Commission on America's Nuclear Future (BRC)
- 2012 BRC recommends DOE adopt a consent-based approach to siting nuclear waste facilities, including consolidated interim storage and geologic disposal sites
- 2013 DOE releases *Strategy for the Management and Disposal of Used Nuclear Fuel and High-Level Radioactive Waste* based on the recommendations from the BRC
- 2015 Secretary of Energy Moniz announces DOE will pursue a consent-based approach to siting facilities for interim storage, as well as disposal of defense and commercial waste

DEVELOPMENT OF GEOLOGIC DISPOSAL

- 1957 National Academy of Sciences recommends geologic disposal for disposing of nuclear waste
- 1970 U.S. begins a search for potential repository sites
- 1970 Lyons, Kansas site selected as the first national repository
- 1972 Government withdraws from operations at Lyons site due to technical uncertainties and public opposition

NUCLEAR WASTE POLICY ACT AND YUCCA MOUNTAIN

- 1982 Congress passes NWPA, establishing process for selecting a disposal site
- 1986 DOE recommends three sites for further study, including Yucca Mountain
- 1987 Congress amends NWPA, directing DOE to study only Yucca Mountain
- 1988-2002 DOE studies Yucca Mountain extensively
- 1998 DOE misses deadline to begin accepting spent nuclear fuel
- FEB 2002 DOE recommends Yucca Mountain as the nation's first disposal site and President Bush submits recommendation to Congress
- APR 2002 Nevada Governor Guinn submits official notice of disapproval to Congress
- JUL 2002 President Bush signs joint resolution approving Yucca Mountain as repository site
- 2008 DOE submits license application for construction of repository to NRC
- 2009 Administration determines Yucca Mountain is not a

	of repository to NRC
2009	Administration determines Yucca Mountain is not a workable solution. DOE suspends activities at the site
	<h2>THE BLUE RIBBON COMMISSION AND CONSENT-BASED SITING</h2>
2010	Secretary of Energy Chu establishes the Blue Ribbon Commission on America's Nuclear Future (BCR)
2012	BCR recommends DOE adopt a consent-based approach to siting nuclear waste facilities, including consolidated interim storage and geologic disposal sites
2013	DOE releases <i>Strategy for the Management and Disposal of Used Nuclear Fuel and High-Level Radioactive Waste</i> based on the recommendations from the BRC
2015	Secretary of Energy Moniz announces DOE will pursue a consent-based approach to siting facilities for interim storage, as well as disposal of defense and commercial waste

A blurry photograph of a park scene. In the foreground, a person's arm and shoulder are visible on the left side. The middle ground shows a green field, a chain-link fence, and a line of trees. The background is a hazy sky.

The Path Forward

CONSENT-BASED SITING PROCESS

**Local
Governments**

**Tribal
Nations**

Communities

States

ensure safe and secure operations

gain trust among stakeholders

adapt operations based on lessons learned

1

Engage with the public and interested parties on the elements of a consent-based siting process

2

Design a consent-based siting process to serve as a flexible framework for engaging with potential host communities

3

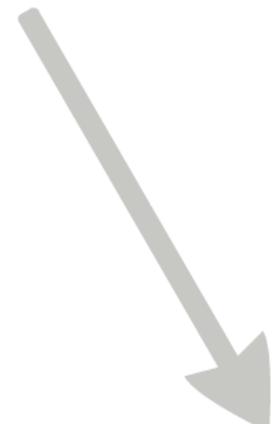

Use the resulting consent-based siting process to work with potential host communities

YOU
ARE
HERE

1

Engage with the public and interested parties on the elements of a consent-based siting process

- How can the Department ensure that the process for selecting a site is fair?
 - What models and experience should the Department use in designing the process?
 - Who should be involved in the process for selecting a site, and what is their role?
 - What information and resources do you think would facilitate your participation?
 - What else should be considered?
-
