# Chapter 14 Cyber Security

The DOE Cyber Security Program aims to protect the Department's diverse missions in a costeffective manner; identify threats, risks, and mitigations; and remain flexible in a changing environment. Key Departmental directives, policies, and procedures governing the implementation of the Cyber Security Program at DOE HQ are:

- DOE Order 205.1B, Department of Energy Cyber Security Management
- DOE Policy 205.1, Department of Energy Cyber Security Management Policy
- Headquarters Program Cyber Security Plan (HQ PCSP)

## **HQ Implementation Procedures**

The head of each HQ element is responsible for implementing a cyber security program within his or her element that conforms to the policies and procedures set forth in the HQ PCSP. Each Head of Element must appoint, in writing, an Information Systems Security Officer (ISSO) and as many Alternate ISSOs as necessary, to support the organization's classified and unclassified systems (see Attachment 1400-1).

The appointment memorandum must be addressed and distributed as shown (see Attachment 1400-1).

Each ISSO receives guidance and assistance from IM-622 through the point of contact identified below.

### **Points of Contact**

For cyber security-related matters, call (202) 586-6691.
